Hello and thank you for downloading my resume!

I am a highly motivated developer always trying to deliver my best in any given situation. I enjoy teamwork, playing golf, listening to music and creating exciting digital solutions and I am always hungry to learn more about, and become better at, the craft of programming. If You read this resume and believe that we can have a rewarding collaboration I am gladly looking forward to hearing from You :)

I have been working with mobile apps since I graduated from the Systems Science program at Gothenburg University, and have had the chance to try out different technologies and ways of working. My main platform is iOS and I am very passionate about the overall development of the platform, its languages and Xcode. My experiences consist of both building new apps from the beginning as well as maintaining and performing incremental development of already existing apps. It has involved working both with Objective C and Swift of different versions. I also have experience of cross-platform development with Xamarin.

I truly enjoy working together as a team, solving problems and making robust, good and performant software. I guess I am a typical developer in the sense that I really like to build as efficient and well-structured code as I can. But I really do feel that coding is teamwork and that you should always discuss and look for a second opinion regarding your solutions. Both to make better results but also to learn.

At my current employer I have mostly been working for a large client here in Gothenburg from the industrial sector, which has a lot of different types of apps, most of them for internal use. Currently I am involved in a project consisting of four different teams of about 7-10 people each, working on a new and exiting solution. In this project I get not only to work with iOS apps but also with backend and API development in Golang with AWS infrastructure.

Also I have a hobby-project that I have been working on during spare time that is available on the Swedish iOS App Store. In this app I am using an open API

from Västtrafik, Gothenburg's public transport provider, to build an app that is – in my opinion – a very useful complement to the existing official app where you can subscribe and track your most commonly used stops and departures. It is written in Swift and also includes a home-screen widget and an Apple Watch version. Find the app by searching for “Nästa Resa” on the App Store.

Apart from software development I enjoy playing golf, following the Biathlon world cup, hanging out with friends and my girlfriend, solving Escape Rooms, running, finance and stocks, the Way out West festival, eating good food and reading the news. I see myself as a diplomatic and easy going person who likes to have a good time as well as being serious about my work and I feel very strongly for the tasks that I am involved in.

If you have any questions don't hesitate to ask them. Looking forward to hearing from you!

Best regards,

Pontus Nilsson Tegnäs

Experience

- *Consultant, Evry Sweden, Gothenburg 2017 –*

Software developer consultant working with a range of technologies and frameworks with a primary focus on app development.

- *Consultant, Crepido AB, Mölndal 2016 – 2017*

Worked as a software developer with a primary focus on mobile development with .NET and C#. My work consisted of both front-end and back-end development.

- *Message Analyst, Enfo Zystems, Gothenburg 2015 – 2016*

Part-time job during my studies. Supported software integrations by addressing different types of errors and problems in messages and infrastructure.

- *Java-supervisor, Gothenburg University, Gothenburg 2014 – 2015*

Supervised and helped new students in Java-programming. Participated at specific occasions and explained concepts and principles within software development as well as answering to questions from the students.

- *Mailman, Posten Norge AS, Oslo 2011 – 2013*

Worked as a mailman in Norway. Also participated in a project where we developed a smartphone app for employees at Posten Norge. My role in the project consisted of bringing up ideas and creating use-cases as well as testing the app in real life-scenarios.

- *Mailman, Posten Meddelande AB, Halmstad 2010 – 2011*

Worked as a mailman and performed different types of tasks within the postal services.

Education

Gothenburg University, Gothenburg – Degree of Bachelor of Science with a major in Informatics. 2016.

Sannarpsgymnasiet, Halmstad – Societal studies. 2007 – 2010.

Merits

Nüsta Resa; Private project

<https://itunes.apple.com/se/app/n%C3%A4sta-resa/id1356267708?mt=8>

More apps that I have developed and worked on can be provided on request.

Technical merits

Swift, Xcode, .NET, Xamarin.Forms, Golang, AWS Lambda, Objective-C, C#, JSON, SQL and databases, Javascript, React-js, REST API, Git.

Methodologies

Scrum, SAFe, Git flow, KanBan, Azure DevOps CI/CD.

Languages

Swedish (native)

English (fluent, work-experience)

German (adequate, my girlfriend is German)

Other merits

Swedish drivers license since 2009.

Credentials

Credentials and/or grades from Gothenburg University can be provided on request.
